INSTRUCTIONS

RAINBOW ONE POT DYE KIT

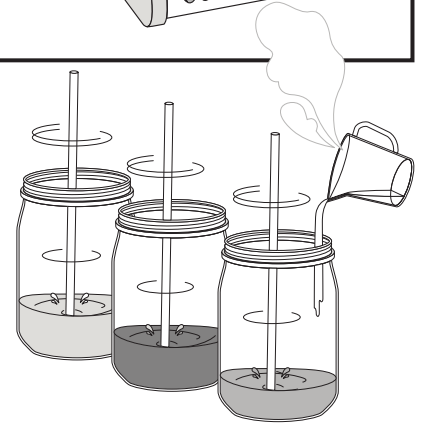

To dye 1kg / 2.2lb Fleece wool you will need:

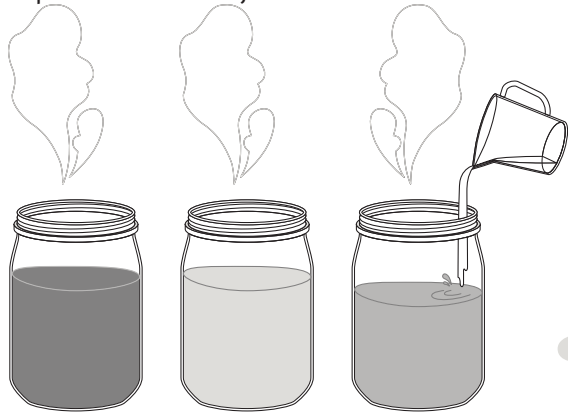

1. Add 1 measured teaspoon of dye powder to each jar.

2. Add 1/4 cup of white vinegar to each jar.

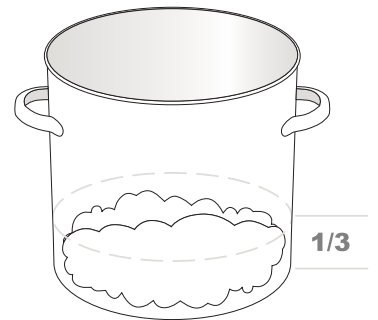

3. Add 1 cup of boiling water. Stir with a stick to dissolve dye.

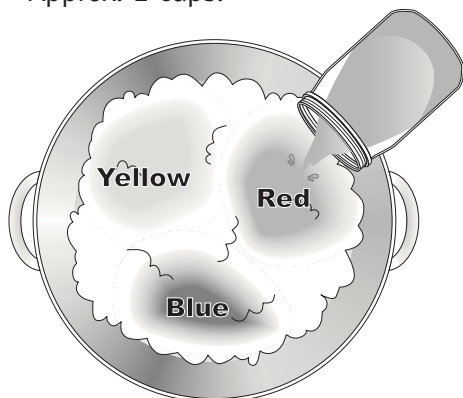

4. Fill remainder of jar with hot water. Approx. 2 cups.

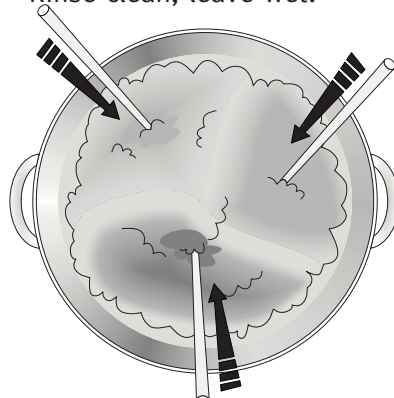

5. Wash the wool with warm water using 1/4 teaspoon of detergent. Rinse clean, leave wet.

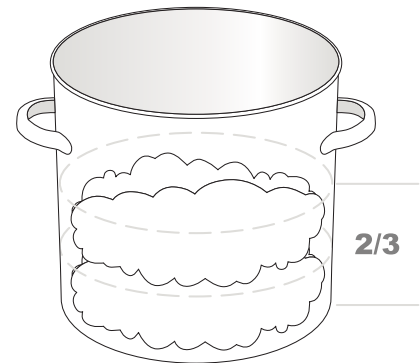

6. Put 1/3 of the wool in a pot.

7. Pour some dye liquid in each area.

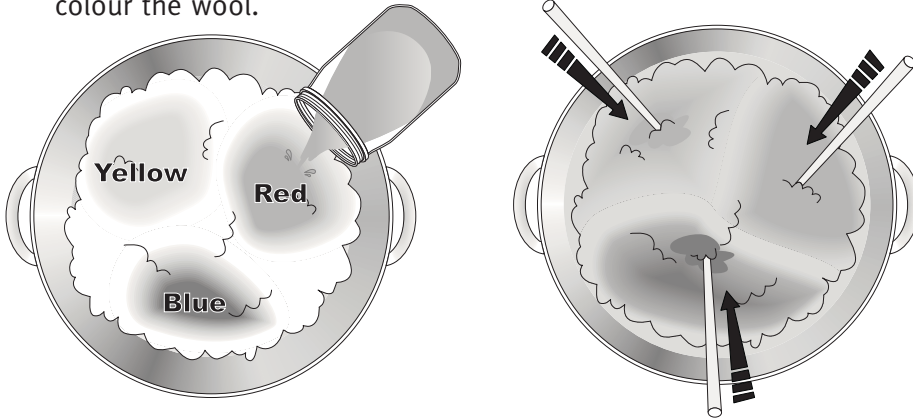

8. Press each colour area with a stick until you cannot see any white. Wool will soak up dye. DO NOT STIR!!

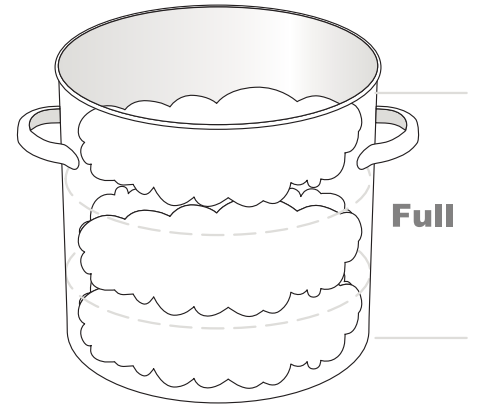

9. Add another 1/3 of the wool.

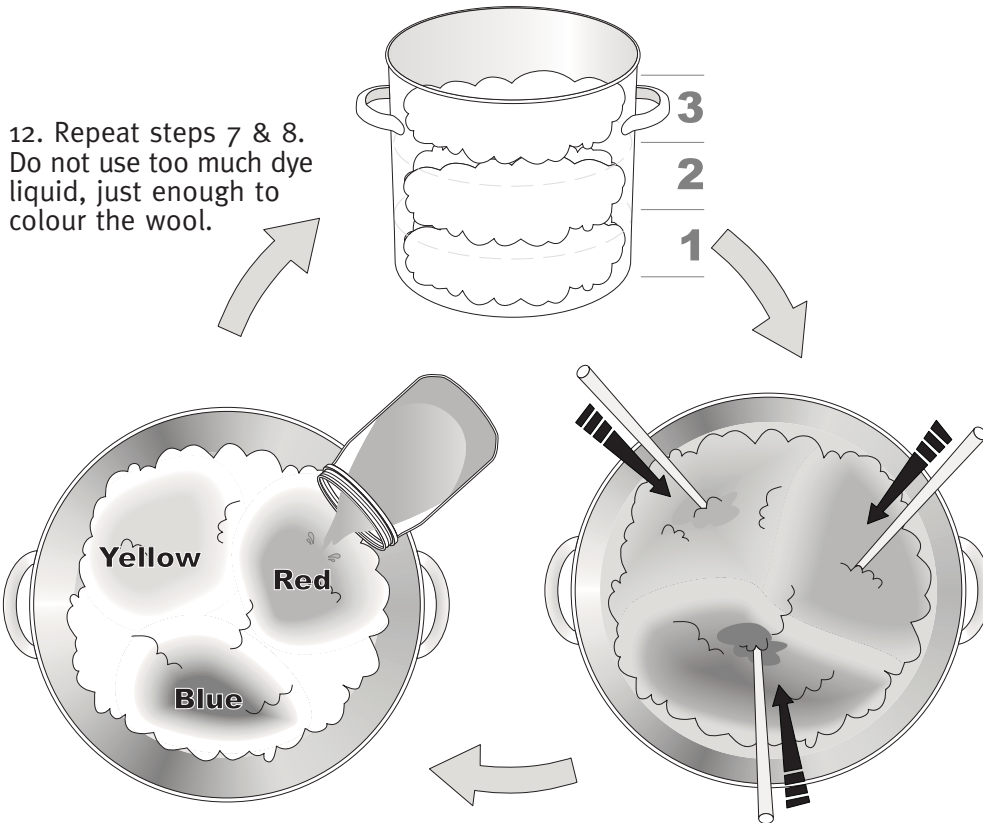

10. Repeat steps 7 & 8. Do not use too much dye liquid, just enough to colour the wool.

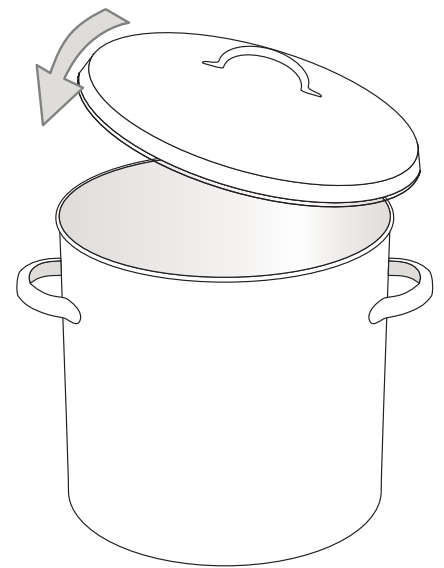

11. Add the rest of the wool.

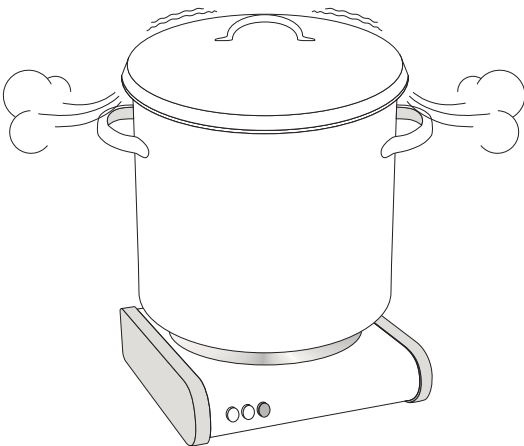

12. Repeat steps 7 & 8. Do not use too much dye liquid, just enough to colour the wool.

13. Place lid on pot.

14. Bring to the boil then turn down to a medium heat. Cook for a maximum of 30 minutes or until the liquid is clear.

15. Drain wool, allow to cool, then rinsing with cold water. Spread out to dry.
